

REMARKS:

Applicant is including a second preliminary amendment with claims directed to the bi-foldable planar body of the monitor. No new matter has been included. However, new figure numbers 26, 27, 28 and 29 have been included to identify respectively, the monitor's bi-foldable body, first and second fold lines and the wall integrally formed between the base and the flap.

A marked up copy of modified drawing Figs. 2, 3, 4 and 5 are included marked in red to identify the drawing changes. Also, a substitute set of drawings is included with the newly added numbers. No new matter has been added to the drawings, or to the specification.

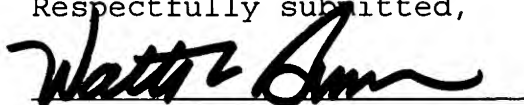

The bi-foldability provides advantages over monitors that must be opened by removing a lid or container. No additional fees are required as the claims now number 17 with a total of three (3) independent claims.

In the event of a restriction requirement applicant provisionally elects method claims 21-27 and 33-36 with traverse.

Applicant believes that the claims as now presented are in condition for allowance and claim allowance is solicited at the Examiner's earliest convenience.

Respectfully submitted,

By:

Walter L. Beavers
